#### Sorensen SG Series

4-150 kW

### **Programmable Precision High Power DC Power Supply**

10-800 V

• High Power Density: up to 15 kW in 3U, 30 kW in a **6**U chassis

- Wide Voltage Range: 0-10V up to 0-800V, in increments of 5 kW from 5 to 30 kW
- Fast Load Transient Response: Protection from undesired voltage excursions
- Low Ripple and Noise
- Hardware Trigger (Ethernet Option)
- Parallelable up to 150 kW
- Sequencing: Free system controller & speed up test
- Low audible noise: Temperature controlled variable speed fans

The Sorensen SG series (hereafter SG Series) represents the next generation of high power programmable DC power supplies. The SG Series is designed for exceptional load transient response, low noise and the highest power density in the industry. With a full 15 kW available down to 20VDC output in a 3u package the SG leads the industry in power density. The power density is enhanced by a stylish front air intake allowing supplies to be stacked without any required clearance between units.

At the heart of the SG series is a 5 kW power module. Depending on the output voltage, one to six modules can be configured in a single chassis to deliver 5 kW to 30 kW of power. Combinations of these chassis can then be easily paralleled to achieve power levels up to 150 kW. Paralleled units operate like one single supply providing total system current. Available in two control versions, the SGA has basic analog controls, while the SGI provides intelligent control features.

#### SGI: Advanced Intelligent Control

(Sorensen General purpose Intelligent) The SGI combines onboard intelligent controls with the outstanding power electronics common to all SG family supplies. These controls enable sophisticated sequencing, constant power mode and save/recall of instrument settings. Looping of sequences makes the SGI ideal for repetitive testing. An impressive vacuum fluorescent graphical display in eight languages, context sensitive "soft" keys and front panel keyboard simplify programming of the SGI.

SGA: Outstanding Value - Analog Control (Sorensen General purpose Analog) The SGA, with its industry leading price performance, is available for customers requiring simple front panel analog controls or external control. With the same high performance power electronics as the SGI, the SGA provides essential features like 10- turn potentiometers for setting voltage and current, 3 1/2 digit LED readout plus front panel over-voltage protection (OVP) preview/adjustment and reset.

Output							
Ripple & Noise (Voltage Mode, Typical)	See Output: Voltage & Current Ranges Chart below. Ripple and noise specified at full load, nominal AC input. Noise measured with 6 ft. cable, 1µf at load						
Ripple (Current Mode)	<+/- 0.04% of full scale rms current						
DC Voltage Slew Rate (40-800V)	≈< 100 ms 5-95% of full scale typical - resistive load (Contact factory for model specific slew rates)						
	Rise Time, ms, max	(	Condition				
Output Voltage Rise Time (10-30V)	10		Measured from 10% to 90% of the output voltage change - resistive load, typical				
	Fall Time, ms max			Condition			
Output Voltage Fall Time (10-30V)	No Load 1	100% CC Load	100% CR Load	Measured from 90% to 10% of the output voltage change resistive			
	50	10	10	load, typical			
Out at Community Pine Time (40, 2011)	Rise Time, ms max		Condition				
Output Current Rise Time (10-30V)	20		Measured from 10% to 90% of the output current change - resistive load, typical				
Outrot Comment Fell Time (10, 2011)	Fall Time, ms max		Condition				
Output Current Fall Time (10-30V)	10		Measured from 90% to 10% of the output current change - resistive load, typical				
DC Current Slew Rate	45A / ms typical -	45A / ms typical - resistive load					
Line Regulation ( with sense wires used )	Voltage Mode: - Current Mode: -	AC input, constant +/- 0.01% of full sca +/- 0.05% of full sca and Current Mode: -	ale (40-800V)	(10-30V)			
Load Regulation (with sense wires used)	(no load to full load, nominal AC input) Voltage Mode: +/- 0.02% of full scale (40-800V) Current Mode: +/- 0.1% of full scale Voltage Mode: +/- 0.05% of full scale (10-30V)						
Load Transient Response	Recovers within 1	ms to +/-0.75% of f	ull-scale of steadystat	e output for a 50% to 100% or 100% to 50% load change			
Efficiency	87% typical at nominal line and max load						
Stability	±0.05% of set point after 30 minute warm-up and over 8 hours at fixed line, load and temperature, typical						
Temperature Coefficient	0.02%/ C of maximum output voltage rating for voltage set point, typical 0.03%/ C of maximum output current rating for current set point, typical						
Output Float Voltage				le recommend the use of optional isolated analog Interface (IAI). ) urrent, in not system current is limited to lower of the two supplies.

Environmental	
Operating Temperature	0 to 50° C
Storage Temperature	-25° C to 65° C
Humidity Range	Relative humidity up to 95% non-condensing, 0° C – 50° C
Altitude	Operating full power available up to 5,000 ft. (~1,500 m), derate 10% of full power for every 1,000 feet higher; non-operating to 40,000 ft. (~12,000 m)
Cooling	Front and side air inlet, rear exhaust. Temperature controlled, variable speed fans. Units may be stacked without spacing.
Regulatory	Certified to UL/CSA 61010 and IEC/EN 61010-1 by a NRTL, CE Compliant, Semi-F47 Compliant. LVD Categories: Installation Category II: Pollution Degree 2; Class II Equipment: for Indoor Use Only. EMC Directive, EN 61326:1998
Front Panel Dust Filter	30 PPI (Pores Per Inch) - must ensure adequate airflow and / or derate max. temperature. 3U unit only.

### **SG Series**

(For units up to 999A, Current is represented in numeric format (rounded to whole Amp), e.g., above "100" represents 100A. For units at 1000A and above, the current is represented by the format "XKX", e.g., 1K2 represents 1200A)

Control Options	A: Analog
	I: Intelligent
Input Options	C: Input Voltage 187 / 242VAC, 3 Phase
	D: Input Voltage 342 / 440VAC, 3 Phase
	E: Input Voltage 396 / 528VAC, 3 Phase
Remote Control Options	OA: No Option
	1A: IEEE-488.2 + RS-232C (Note: SGI comes standard with RS-232C) 1C: Ethernet + RS-232C
	1D: Isolated Analog Control
	1E: Shaft Locks (SGA series only)
Process Options	AA: No option
	AB: Certificate of Calibration (includes Test Data)
Modifications	AJ: Front panel dust filter - factory installed - 3U unit only
	CV: 400Hz AC input @ 208 VAC ( does not carry CE, CSA or UL marks ) ( 6U only ) STD on 3U
	PF: Passive power factor correction to 0.9 (Only applicable to 40V, 60V to 800V. Included in 10V-30V and 50V.)
Accessories	890-453-03: Paralleling Cable (for up to 5 units, requires one cable per unit placed in parallel)
	K550212-01: 3U Rack Slides (for 5kW, 10kW and 15kW models) K550213-01: 6U Rack Slides (for 20kW, 25kW and 30kW models)
	5550568-01: Front panel dust filter - field installation kit - 3U unit only
	9550589-01: AC input cover - 3U unit only
