

## **Important Safety Instructions**

Please read the following warning and caution carefully before using this battery charger

This battery charger has been customised to charge PPM Nickel Metal Hydride (NiMH) battery packs ONLY.

### **WARNING**

#### **DO NOT CHARGE PPM NiCd batteries with this charger.**

Connecting PPM NiCd battery packs to this charger may permanently damage them.

This battery charger is supplied with its' charging configuration set to 'AUTO' mode.

It is possible to change and store the configuration setting for other applications.

Alternative configuration settings will not properly charge NiMh battery packs.

Do not reconfigure the charger for any setting other than 'AUTO' mode.

### **CAUTION**

Changing the battery charger configuration setting from anything other than 'AUTO' mode will degrade PPM NiMH battery pack performance.
